

Ebi Emmerich-Adehor

AI Software Engineer

Herne, Germany [+49 179 3246916](tel:+491793246916) ebivien42@gmail.com [LinkedIn](#)

Summary

Software Engineering graduate (Masterschool, 2026) with a BSc in Computer Science and a focus on AI-driven applications. Experienced in developing full-stack solutions using Python, Flask, JavaScript, SQL, and REST APIs. Built projects including a movie recommendation engine, an AI auditing platform, and an Android ROM simulator. Strong communication, analytical, and problem-solving skills gained through technical and professional experience. Seeking an AI Software Engineer role to build innovative, user-focused AI solutions.

Technical Skills

Programming Languages (Python, JavaScript, HTML, CSS, SQL, SQLite, Flask),
AI & Machine Learning (OpenAI API Integration, Large Language Models, Prompt Engineering, Conversational AI),
APIs & Tools (REST APIs, Git/GitHub)

Soft Skills

Problem-solving, Teamwork, Communication

Education

Masterschool
Software Engineering

Nov 2025 - Jul 2026
Training Program

- Acquiring hands-on experience through an immersive program, developing full-stack applications using JavaScript, React, Node.js, and SQL.
- Applying software engineering principles such as object-oriented programming (OOP), test-driven development (TDD), and version control (Git, GitHub) in real-world projects.
- Building and deploying scalable applications using RESTful APIs, cloud services, and CI/CD pipelines, improving system performance and maintainability.

Ambrose Alli University
Computer Science

Sep 2000 – Aug 2005
Bachelor of Science

- Engineered and executed a unified firewall security solution, established access controls and network policies, thereby enhanced system performance, reliability, and security.

Projects

Movie Database Assistance
[View Project](#)

Jun 2026

- Developed an AI-driven cinematic assistant that provided tailored movie recommendations, engaging user interactions, and content discovery.
- Developed using Python, Flask, HTML, CSS, JavaScript, SQLite3, TMDb API, OpenAI models, and a QR generator.
- Built a scalable backend architecture that supported real-time movie recommendations via seamless API integrations, optimized data flow, and enhanced system responsiveness.

AI Auditor
[View Project](#)

May 2026

- Engineered a comprehensive AI auditing platform, AI Auditor, that was designed to assess and rate language precision, boundary compliance, and adherence to instructions, thereby producing clear and detailed performance reports.
- Developed using Python, HTML, CSS, JavaScript, Flask, and SQLite3.
- Built a comprehensive AI auditing platform that assessed language safety, instruction adherence, and boundary compliance, enabling systematic evaluation of model behavior under structured constraints and policy-aligned conditions.

Omnisentry-AI
[View Project](#)

May 2026

- Developed an AI-powered website trust verification system designed to enhance online safety by evaluating website credibility in real time before user interaction.
- Built an intelligent security layer that analyzed domains, security signals, registration data, and reputation indicators to deliver actionable trust insights instantly.
- Implemented a browser-based security assistant that detected potential threats such as fraud and malware, helping users make safer browsing decisions through automated risk assessment.

Experience	AWO Primary School Care	Sep 2023 – Jul 2024
	Care Assistant	Herne, Germany
- Contributed to the educational, social, and personal development of 15 children by fostering a supportive learning environment. - Promoted teamwork and communication skills through the design and implementation of structured group activities. - Monitored and evaluated individual student progress to develop tailored learning plans addressing each child's unique needs.		
	Robert Brauner Special Needs School	Apr 2022 – Jul 2023
	School Aide	Herne, Germany
- Delivered personalized academic and classroom support to a student with unique educational requirements, enhancing daily classroom engagement by 30%. - Customized learning resources and teaching methodologies to cater to the student's specific needs, boosting understanding of lessons and completion of assignments by 25%. - Worked in unison with two educators and the student's guardians to execute tailored learning plans, fostering consistent progress across diverse subjects throughout the academic year.
